Mines and Prospects--Furnaces and Mills

Another Big Strike in Mines of Alta

Eight Feet of Ore in Property Under Option-Condition at Quincy Is Interesting.

Of the latest developments at the proprties of the Quincy Mining company, and the change which occurred at a point 1370 feet within the tunnel, Alex Coloath, manager of the undertaking, said cath, manager of the undertaking, said on his arrival from camp again that he mis uncovered a good quality of lead ore, while associated with that metal are many units in silver, with some gold. For eighty feet the channel has been opened up, and the condition is hourly becoming more interesting. The discovery of carbonates, in which form the new ores are asserting themselves, is at a vertical depth of 55 feet, and as this is the lowest point at which ores of this class have occurred on that side of the zone the oldest miner there is interesting himself. When he left camp and made his way through the storm there were two feet of this ore exposed in the drift, while the channel shows a width of over eight feet.

the channel shows a width of over eight feet.

At the Columbus Con, he reports the bins containing a very large tonnage of concentrates, and unloss something occurs to relieve them from the weight of this congestion in a very few hours, something is likely to give way. He does not speak very cheerfully of the condition of the reads between the camp and the valley at this time, and several days will be required to dry them out. At the Continental the management is waiting on additional buckets for the tramway, and with these adjusted the forwarding of ore to the new plant will begin, the production of concentrates to follow.

Mr Colbath says a most important discioure has been made in one of the new diggings at the camp, but pleaded that he was not at liberty just at this time to discuss it or to divuige the name of the referred to no less than eight feet of or in a property which was taken hold of a short time ago by a prominent mining man in this city, and of which Mr Colbath was requested to make an examination. Until he reports to the former rothing will be said of the find or its location in detail.

THE GREENBACK'S GOLD.

Resources of Bonanza Necessitate Additional Stamps.

In the properties of the Greenback Mining company out of Leland, Or., developments that exceed anything in the previous history of the undertaking are reported, and to meet the requirements of the output Manuger Brevoort has decided that inity stamps be added to the present hattery with which the mill is equipped. According to the report which was received by Clarence K. McCornick. for several years the possessor of an interest in the Greenback, the management has along a serpentine dyke, through which a hole was punched at the suggestion of Harry Joseph, opened up thirty feet of the best willing ore that has been encountered in the properties. This condition, developed originally on the 50% foot level, has been reproduced on the 50% foot level, has been reproduced on the 50% foot level, has been reproduced on the state is now exploited as one of the most valuable of which the State is permitted to boast. The mines are practically owned by Messrs Brevoort and McCornick, these gentlemen having been purchased of former associates at a period when the resources of the property were not so dazzling as are they at this time. The former is now on his way to camp, where he will probably be met by Mr McCornick. ents that exceed anything in the pre-

BULLY HILL MINES SOLD.

Capt. De Lamar Disposes of Big California Proposition.

According to advices from the far West Capt. J. R. De La Mar has been induced to part with his Bully Hill mines and smelter in Shasta county, Cal., the purchasers, a syndicate of Eastern Investors, with some inclined to the impression that the Guggenheims are behind the deal. While the consideration to which the Captain has succumbed is not known, it is said that it has enabled him to add another million or more to his vast deposits, and that with Hartwig A. Cohen is his manager, his attention will now be devoted to the exploitation of the gold-bearing properties acquired by him last year in the Funeral range, California. Of that undertaking it is said that it is now ready for a mill, and that it promises to become one of the most productive of the researches of a master miner. Capt. J. R. De La Mar has been induced researches of a master miner

AT GOLD BLOSSOM.

Work on North Tintic Undertaking to Be Pushed.

Special to The Tribune

AMERICAN FORK March 31 - The officers of the Gold Blossom mine, in North Thatic, are fitting out another force of men who will leave here to increase the prefent working force. The property has assumed a very promising condition, and the officers, very much enthused over its development, are determined to push work.

development, are determined to push work

John H Wootton, member of the recent Legislature, and who was erroneously connected with the Steele mining
strike which was made in American Fork
canyon last year, desires to be set right
in the matter. He stated to The Tribune
representative today that the bond and
lease on the Silver Glance property was
no false alarm, and that it is his intention
to renew the bond and lease on that property and begin development.

A PAYMENT MATURING.

Retiring Interests in Blue Bell to Take Down Another.

Thirty days more, said one of those participating in the sale of the "McChrystal interest" in the sale of the "McChrystal interest" in the Eagle & Blue Bell, during the afternoon, and the Bingham Con, by which the purchase is being made, will come forward with another \$40,00 remittance. While this interest is being gradually retired, none are more exultant over developments at the property, the head of the house of McChrystal having always contended that the properties would develop into most productive ones.

RARE METALS DEAL.

Syndicate to Leave Chicago for the La Sals Properties.

A correspondent, writing from Miners' Basin, in the La Sals, says word has reached there that the Chicago syndicate reached there that the Chicago syndicate negotiating for the Welsh-Loftus rare metals property will leave there on the Elst inst. for that country to formally close this important deal. These same gentlemen, Messrs, Juneau and Fitzgerald, left Chicago in February to visit that country, but the bad weather and snow forced them on to Salt Lake and back to Chicago. They now propose to make their trip good in spite of the weather. If everything is favorable work will be started up at once.

THE DAY ON 'CHANGE.

Market Quite Buoyant, Although Trading Was Light.

The day on the mining exchanged closed on the sale of 13,825 shares of stock for on the sale of 13.83 shares of stock for \$204.23 and on a market that was generally quite buoyant. May Day, the reports from whose Tintic property are all indicative of substantial advances before the close of the month, was again at the head of the advancing column and closed on a transfer at 17% cents, while its neighbor. Uncle Sam, had climbed back to 40 cents, with the shares changing hands on the curbstone at a pronounced advance over that figure. New York recorded cents, with the shares changing hands on the curbstone at a pronounced advance over that figure. New York recorded steady gains and sold at 50 cents at the day's finish, while Butler was in good de-mand around 14. Little Bell of Park City came out to a bid of 40 cents, while Vic-toria changed hands at \$1.85 and Daly at \$2.50, the day closing on the following market:

To Direct Campaign at the Yampa Mines

New Superintendent Designated by the Management Long in Western Diggings.

To supply the vacancy created by the resignation of W. J. Craig from the su-To supply the vacancy created by the resignation of W. J. Craig from the superintendency of the Tintic company's Yampa mines at Bingham, Manager Walter S. Kelley has designated William Davey, the latter at present serving the Lightner Mining company in a similar capacity at Angels camp, Calaveras county, California Mr. Davey, who came over to survey the new field before finally accepting the responsibilities departed for the west again yesterday, and to return as soon as it is possible for him to do so without inconveniencing the management of the properties on the Pacific. For ten years Mr. Davey was associated with Mr. Kelley in Montana, and at the properties of the Eikhorn company in that State achieved a most enviable record. He also served with Manager Kelley upon the properties of the same company at Leadville, and subsequently in Arizona. The new superintendent of the Yampa is a brother of Thomas Davey, who is known to not a few in this city as the general superintendent of the De Lamar mines in Idaho. At the properties of the Lightner company, where a very large tonnage of ore is being daily reduced at this time, he has made an enviable record, and upon his acquisition Manager Kelley is constrainfaint of the Parameter of the Yampa have been among the most conspicuous at the Camp of Copper, will, after well-carned relaxation, devote his attention to personal interests at Alta and elsewhere in the State and his departure from the company's staff at Bingham is characterized by the keenest regrets of the management, as well as those who have been under his immediate supervision.

DEAL IN PROGRESS.

Expert to Investigate Properties Along the San Pedro.

Special to The Tribune

CALJENTE, March 23.—C. J. Marsh, the freight and stage man, returns here this week to start up work on his corrals and warehouses for the new freighting line between Callente and Goldfield. It is understood that an immense amount of freight for Goldfield and Intermediate points now lying at Salt Lake will be transferred to Callente for freighting to the gold districts by the new line.

A deal is well under way between the

by the new line.

A deal is well under way between the Louislana Purchase Mining company and California capitalists for the sale of the mines. The group consists of nine claims three miles from Caliente and one mile from the line of the Salt Lake road and consists of seven low-grade ledges and two cooper ledges on claims on which two springs, flowing at least forty miners inches, will supply all the water needed for treatment of the ores. President Frank Palmer states that he anticipates a visit from an expert for the prospective purchasers this week. On his decision rests the sale of the group.

chasers this week. On his decision rests
the sale of the group.

Maurice Blanchard and Nute Wilcox,
prospectors, came in from Kawich this
week with the most magnificent specimens of free gold ever brought into Caliente. They had nuggets of solid gold as
large as a hazel nut imbedded in white
and oxydized quartz; gold spread over a
five-pound chunk of quartz seemingly half
the weight of the entire piece; gold running in wire through and around big
pieces of white quartz, and gold set as
with the leweler's art into honevcombed
quartz; gold running up to \$40,000 per ton
and lots of it. They state that Kawich is
the coming gold field of the world and
that prospectors and investors are pouring into the town daily

GOLDFIELD TO VEGAS.

Intervals Between the Various Camps Along the Strip.

Along the Strip.

Defining the distances between the various camps for which so many prospectors are now headed the Journal of Reno says. Goldfield is twenty-eight miles south of Tonopah sixteen miles south of Goldfield is Tank Springs, twenty-nine miles south brings one to Summerville, the new strike, which is three miles west of Thorp's mills. Twenty-eight miles south from Summermille is muddy spring; eight miles south from Muddy spring is Old Builfrog or Amagoza (now deserted) where the original Builfrog mine east is from the Original Builfrog mine east is Rhyolite, a town of 40 population, the center of the Builfrog district, now about elx months old. Three-quarters of a mile south is the new town of Builfrog, formerly called Bonanza. From Rhyolite to Beatty, a town of 500 people, is four miles northeast, passing the rich Montgomery-Eowards mine. Going further south from Beatty four miles one reaches Gold Center, with its 250 people. One hundred and ten miles southeast from Builfrog are located the rich strikes of Las Vegas, reached by some via the Clark railroad and stage.

MR. FREUDENTHAL ARRIVES

Saw Old Bonanzas With Which He Grew to Manhood.

Grew to Manhood.

Edward F Freudenthal, under whose management not a few of the big undertakings at Ploche, Nev. achieved their prestige, came in from the old camp again yesterday morning to confer with Manager Milliken of the Nevada-Utah company, and to whose field staff the stalwart visitor was among the first to be attached While declining to discuss the movements of the big company which has, under Col. Weir and Manager Milliken, taken so eagerly to the obligations ahead of them. Mr. Freudenthal says of the camp that it will undoubtedly be a scene of greatest activity in a short time, and that already many of those with whom he grew up are railying about familiar spots to prepare themselves for a role in the revival of those diggings. Mr. Freudenthal himself is the owner of much likely property in the region and is preparing to inaugurate work in several places.

Liquidation in Coppers. Special to The Tribune.

BOSTON. Mass., March El.—Liquidation was more pronounced in the copper shares today and prices declined sharply at times. Traders helped prices on their downward course by offering stocks below commission house brokers, with the expectation of getting them in lower. This market was, however, rather quiet after the opening and inclined to follow the New York list. In the afternoon a better demand was seen and a good rally ensued with the close prices strong. Traders are inclined to look for a further raily. Hornblower & Weeks, brokers, B. State street. Boston, and io Wail street, New York, furnish the following quotations. Special to The Tribune.

They are pleasant to take and agreeable in effect. For sale by all leading

Big Gold Discovery in the Yankee Con.

Sensational and Instructive Condition Developed in Properties on Godiva Hill, Tintic.

Down at the sampler is a consignment of ore from the properties of the Yankee Con. company on Godiva hill. Tintic, which tells the story of one of the most instructive if not of the most sensational disclosures in the chronology of that most productive strip of earth. The lot was taken from a raise above the 190-foot level, and while camp masays tell of the presence of some silver, it is of such insignificance as to detract nothing from the claim of the shareholder that it is, perhaps, the first "ultra" gold shipment to come from the locality. From it results have been obtained, indeed, that show as much as \$220 gold per ton, while the smallest assay certifies to no less than \$38 of that metal per ton. While the disclosure is something new and the management has not had time to determine the extent of it, five feet of this ore was exposed when the report reached the general offices yesterday, while there is evidence that it is dipping over the level above which it occurs, and that it is headed for greater depths. There was a period in the development of the territory along Godiva when Uncle Jesse Knight uncovered not a little gold ore, some of it visible to the naked vision, but he was bever permitted to send it in as a "gold shipment," as has the management of the Yankes. The lot "cill be sold on today's market, with another to follow in a short time. Meanwhile the treasury of the company continues to grow and while the "ghost" has not shown an inclination to walk. It is said that the surplus at present is not less disclosures in the chronology of that most

SALT LAKE'S OPPORTUNITY.

Tremendous Traffic on Roads Camps of Nevada Gold Fields.

With which to move supplies between with which to move supplies between the depot at Tonopah and the various camps of which it has long been the undisputed gateway, said a prominent mining man who has just returned from that region, the freighters are at present cracking their whips over as many as 2500 animals and yet it is impossible for them to meet the requirements of the shipper. While the freight is being looked after by this class of carriers, who are exerting every effort to accommodate their patrons, another class is endeavoring to handle the mass of humanity that is pouring into the new field of gold, and the thoroughfares are a scene of as much animation at the dead of night as are they in the noon of the day. Notwithstanding this equipment for the movement of supplies complaints with profanc emphasis are heard at all hours and never was better opportunity afforded the jobbers of a city to enter a most profitable field through a competitive route. The market is there for the man who is prepared to supply the needs of the camps and the first on the ground will be the jobber to command the patronage of the camps no matter the market he represents. The consumer is tired of delays and he wants the goods. he depot at Tonopah and the various

Activity in Lincoln County.

Mining affairs in Lincoln County are on the up-grade. Not only are the prospectors in the hills thick, but mining men from Colorado, Idaho, Montana and Utah are coming in in large numbers, and the old districts, which have been tile for years, owing to lack of transportation for supplies, are taking on new life and a number of bonds and sales of mines are occurring daily says the Logic of De Lawre. over of bonds and sales of mines are oc-curring dally, says the Lode of De Lamar

At Pahranagat district there have been At Pahranagat district there have been several properties bonded, and last week Logan Russell of Denver, accompanied by his expert, Murray Lee, arrived in Pioche on their way to Irish Mountain, with a view to obtaining a hold on mines in that district which he had reported to him.

Ores and Bullion.

In the ore and bullion market the day's settlements amounted to \$85,200 McCornlek & Co. reporting them as they follow: Bullion, \$33,200; soid bars, \$10,000; gold, silver, lead and copper ores, \$42,000. In the metal market silver ruled at 57½ cents an ounce, lead at \$5.0034.45 per hundred pounds, and casting copper at 14% cents a pound.

Mining Notes.

IN THE DISTRICT COURT OF THE nited States for the District of Utah.— n the matter of John W. Beck, bankrupt No. 74 in bankruptcy.—Petition for dis-

No 74 in bankruptcy—Petition for discharge.

To the Honorable John A Marshall, Judge of the District court of the United States for the District of Utah:

John W. Beck of Sait Lake City, in the county of Sait Lake and State of Utah in said district, respectfully represents that on the 12th day of August last past, awas duly adjudged bankrupt under the acts of Congress relating to bankruptcy, that he has duly surrendered all his property and rights of property, and has fully compiled with all the requirements of said acts and of the orders of the court touching his bankruptcy.

Wherefore he prays that he may be decreed by the court to have a full discharge from all debts provable against his estate under said bankrupt acts, except such debts as are excepted by law from such discharge.

Dated this 20th day of March, A. D. 1906.

Bankrupt, ORDER OF NOTICE THEREON.

Bankropt.

ORDER OF NOTICE THEREON.
District of Utah:
On this 23rd day of March. A. D. 1965.
or reading the foreging petition it is.
Ordered by the court, that a hearing be had upon the same on the 7th day of Arril. A. D. 1905, before said court at Sait Lake City, in said district, at ten o'clock in the forenoon; and that notice thereof be published in The Sait Lake Tribune, a newspaper printed in said district, and that all known creditors and other persons in interest may appear at the said time and place and show cause, if any they have, why the prayer of the said petitioner should not be granted.

And it is further ordered by the court, that the Clerk shall send by mail to all known creditors copies of said petition and this order, addressed to them at their places of residence as stated.

Witness the Honorable John A. Marshall, Judge of the said District court, and the seal thereof, at Sait Lake City, in said district, on the 23rd day of March. A. D. 1906.

Attest. JERROLD R. LETCHER. (Seal of Court.) Clerk.

IN THE DISTRICT COURT OF THE inited States for the District of Utah— in the matter of W H Goldman, bank-upt—No, 759 in bankruptey.—Petition for the banks.

discharge.
To the Honorable John A Murshall, Judge of the District court of the United States for the District of Utah.
W. H. Goldman of Murray, in the county of Sait Lake and State of Utah, in said ty of Sait Lake and State of Utah, in said district, respectfully represents that on the 15th day of November last past, he was duly adjudged bankrupt under the acts of Congress relating to bankruptey; that he has duly surrendered all his property and rights of property, and has fully compiled with all the requirments of said acts and of the orders of the court touching his bunkruptey. Wherefore he prays that he may be decreed by the court to have a full discharge from all debts provable against his estate under said bankrupt acts, except such debts as are excepted by law from such discharge.
